

SMART HEAT INSULATION

Energy Saving Radiator Foil

In times when everyone is trying to do their best for the planet and save on energy bills, unnecessarily heating walls is inefficient and wasteful. Thanks to Abriso Jiffy's radiator foil solutions, **up to 90% of direct radiant heat** will now be reflected back into the room.

Reflects up to 90% of direct radiant heat

Can be applied on the wall or behind the radiator

Efficient energy-saving measure

Customizable with own label

Easy to install with double-sided adhesive tape

Can also be used to insulate walls, tubes, floors & roofs
