

OCEAN GREEN ABRIPROFILE®

Abriso Jiffy not only protects your products, but also the planet. Everyone is more and more aware of the impact on the environment. That is why Abriso Jiffy designed, **Ocean Green®**. This green story focuses on the planet, waste reduction, top quality and customer satisfaction. Unique challenges require unique solutions.

**Ocean Green
better for
Mother Nature**

Ocean Green® profiles and Ocean Green® bubble wrap, recognisable by their green colour, are made from up to 100% recycled material and are 100% recyclable. The switch to Ocean Green® means more materials are reused. Abriso Jiffy attaches great importance to a sustainable and ecological process.

The technology of our Ocean Green® protective **ABRIPROFILE®**, has the same exceptional quality as the former blue profiles. Ocean Green® has become our standard product.

High-Resistance PE Foam Solutions

The Ocean Green® ABRIPROFILES® are made of extruded polyethylene foam, available in different densities and dimensions. This customised PE-foam gives a very high resistance to scratches and impacts. Its wide range gives you, as customer, the opportunity to choose from a variety of possibilities. There is no product for which we do not have a PE protection profile.

Can't find what you are looking for? No problem! As a manufacturer, together with our R&D department, we are happy to look into the possibilities of developing and producing a product especially for you.

Yes, we can make it for you!
